

Permafib is proud to join forces with the [Ottawa Senators Foundation](#) for the construction of outdoor skating rinks within the SENS RINK program.

The foundation is committed to promote physical activity among youth . Lack of physical activity has become a social problem which the foundation wishes to act against by proposing concrete actions. Daily access to sports facilities must be readily available and encouraged.

To propagate the spread of healthy habits in the lives of hundreds of children and families, 20 SENS RINKS will be built to enable children and their families to skate, play hockey, ball hockey, lacrosse, and much more, all year long.

The rinks will be built in Ottawa, Gatineau and in the surrounding region.
